RE: Supplier Quality – Outstanding FY10 Performance: INTERIOR & EXTERIOR Business Unit

As has been communicated consistently over the past year, the CUSTOMER is our #1 priority, and Product Quality is vital to satisfying them.

I would like to take this opportunity to thank you for your company's strong performance towards making Quality a priority within your company. You have ranked within the top two tiers of our Scorecard rating for fiscal year 2010. We understand the effort required each and every day to meet this level of performance, and sincerely appreciate your efforts.

At Nissan, we fully understand that there is no future for a car company that does not take care of its customers and therefore there is no future for a Supplier with Nissan that does not have an acceptable Quality score.

As such, Nissan is placing ever more importance on reaching the highest Quality levels, both from our Suppliers, as well as ourselves. I count on your continued high performance and our close partnership as we strive towards even greater Quality results in FY11 and beyond.

Kind regards,

Bill Krueger
Vice Chairman
Nissan Americas
