

KINEMATIC BIN ASSEMBLIES

JVIS currently offers kinematic bins to the automotive industry that are utilized in instrument panels, overhead systems and other interior systems. JVIS produces bins which have various capabilities and features including damped, push-push latching systems that meet all vehicle impact and customer haptic/tactile requirements. In addition, JVIS bins incorporate various uses of customizable lighting which are functional and also enhance the customer's interior perception. In addition, JVIS bins incorporate various electrical functions, inclusive of auxiliary power, USB connectivity and the potential to integrate wireless charging. At JVIS, we design, develop, validate and produce interior kinematic bin assemblies that exceed customer expectations. If you require more information, please **contact us** on our website or by using the information listed to the right.
