

BACK UP CAMERA SYSTEMS

Today's drivers are more safety conscious than ever. With our full line of automotive cameras seeing is believing. All of our cameras are fully automotive compliant. We use state-of-the-art technology for distortion correction, grid line pathway guides and are programmable. Our rear view and surround view systems enable improved object detection, communication and HMI controls. Sealed against the environment they are the perfect solution to your visual automotive requirements. JVIS offers a number of video output signals to meet your specific needs. JVIS can also integrate our cameras into a variety of trim packages that could include chrome or painted fascia's, bezels and handles to match your vehicle platform requirements. As a full service partner, JVIS will design, certify and integrate your rear, forward and surround view camera systems in vehicle. If you require more information, please **contact us** on our website or by using the information listed to the right.
