

# ILLUMINATED CUP HOLDERS

JVIS has developed illuminated trim for almost every corner of the car. We have mood lighting, sweep lighting, ambient lighting and convenience lighting. We use the latest innovations in lighting such as OLED's and LED's. All of our lighting assemblies are highly engineered using our proprietary software. We have confidence from the 1st samples that our products will meet your expectations. JVIS can support the development of an entire interior project down to a single component. We will ensure harmony and consistency of all of the lighting throughout the vehicle. If you require more information, please **contact us** on our website or by using the information listed to the right.
