

METALLIC HINGE ASSEMBLIES

JVIS currently offers metallic hinge assemblies to the automotive industry that are utilized in instrument panels, console armrest assemblies and other interior systems. JVIS produces hinge assemblies that meet or exceed all customer durability requirements inclusive of life cycle and side loading. In addition, JVIS latches are developed to ensure smooth and noise free operation over the life of the assembly. At JVIS, we design, develop, validate and produce metallic hinge assemblies that exceed customer expectations. If you require more information, please **contact us** on our website or by using the information listed to the right.
