

# ILLUMINATED HEADREST

The back of headrests can be mundane and commonplace. At JVIS, we don't think so. That is why we have pioneered lighting innovation that can support interior branding and thoughtful illumination to give headrests further function ability and help support the ambience needs of interior design. Combined with our stylishly yet elusive illuminated logos, we have further redefined where light can be placed so it best suits the needs of the passengers. This type of innovation will certainly evolve as interiors become more harmonious with lighting. The result? Headrests don't need to be commonplace anymore. If innovation with lighting is your requirement, than talk to us how we can help you get to the next level. Lighting doesn't need to take a back seat anymore. If you require more information, please **contact us** on our website or by using the information listed to the right.
