

PLASTIC LATCHING SYSTEMS

JVIS currently offers plastic latching systems to the automotive industry that are utilized in instrument panels (glovebox doors, etc), overhead systems and other interior systems. JVIS produces plastic latching systems that meet all customer requirements including vehicle impact and customer haptic/tactile requirements. JVIS plastic latching systems are developed using computer aided kinematic design to ensure proper engagement while optimizing functional efforts. In addition, all plastic latching systems are design to minimize objectionable noise while providing a robust, quality feel. At JVIS, we design, develop, validate and produce interior plastic latching systems that exceed customer expectations. If you require more information, please **contact us** on our website or by using the information listed to the right.
