

# WIRELESS CHARGING

JVIS USA, LLC introduced the worlds first In-Vehicle wireless charging system in the Dodge Dart at the 2012 Detroit Auto Show. This breakthrough technology showcases a wireless charging system located between the instrument panel and center stack of the vehicle, allowing drivers to charge their smart phones wirelessly while utilizing Bluetooth technology to make hands free phone calls, stream music, conduct conference calls or simply navigate city streets with GPS. All this smart phone use while maintaining a full charge wirelessly through the vehicles wireless charging system. Thus, saving valuable battery life for more important moments throughout the day. Chrysler was nominated by AOL Autos at the 2013 Consumer Electronics Show for Automotive Technology of the Year for Wireless Charging in the Dodge Dart. JVIS USA LLC has many vehicles on the road today with wireless charging systems. Look for more vehicles on the road with other great brands such as Ford, Chrysler, Toyota, Dodge, RAM and more coming soon. If you require more information, please **contact us** on our website or by using the information listed to the right.
